Prado
Garden

The Prado artificial grass, with a height of 50 mm, combines straight fibers with semi-texturized fibers, both featuring a triple-C cross-section and available in 5 shades of green. With Look&Feel technology, it achieves an impressively realistic appearance. The KDK technique used in its production ensures better resilience to foot traffic and shape memory with MaxRecover technology.

Its design promotes optimal drainage with MaxDrain technology, making it ideal for outdoor use, while its root-effect texturized fibers provide softness and comfort.

With an excellent quality/price ratio, it is child-safe, non-flammable, and bacteria-resistant, making it the perfect choice for residential gardens. Furthermore, it is easy to maintain, durable, and resistant.
